I had attended various training programs in my career of 25 years. I never seen, how a complex subject, like Oracle HCM, can be introduced to the learners in such a clear and crisp way. Mr. Kumar is one of the best trainers I have met so far (similar to Mr. Khan sir from Patna 🇮🇳), who can retain the attention span for the entire one hour without any difficulty. The very fact that he repeats the critical points, multiple times with a salutation of "dear team" put the concept into your brain lucidly.
